MarkIV Industrial TrimMaster

Premium Heavy-Duty Cam-Locking Siding Brake

DURABLE - PORTABLE - BENDS UP TO 24GA

The Mark IV Industrial TrimMaster® is the most portable brake capable meeting the demands of the metal roofing and metal building industries. Versatile in its ability to perform various complex bending profiles with ease. Go from bending simple flashing to intricate outside corner posts without making any adjustments to the brake. For decades, the durable Van Mark Cam-Locking system has proven to be easy on the operator while remaining reliable without constant adjustments or maintenance. The Mark IV is traditionally used to bend materials from .019" aluminum up to 24 Gauge painted steel roof panels. Xtreme folding stand is easy to set up and tear down on the jobsite.

POWERlock Cam Locking Top-Bar (F-Bar)

POWERlock™ provides secure clamping without the need to make adjustments when changing material.

Efficiently Designed to Save Time

Increased bending radius simplifies hemming resulting in easier operation and better results. POWERslot™ hinge "auto-measures" a 5/8" hem with ease.

Ready for Accessories

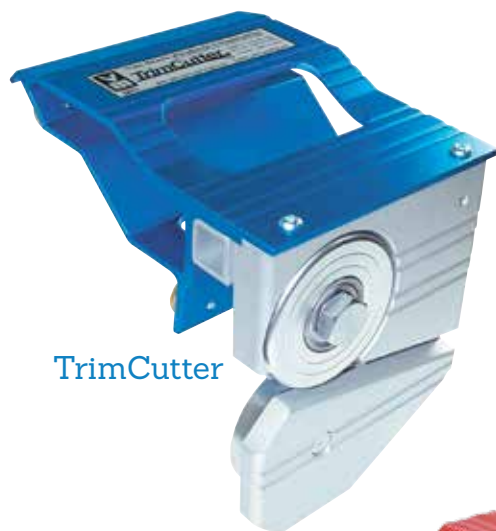

Features Van Mark's unique AccuTrack rail system to support recommended accessories like TrimCutter & TrimFormer.

Sized Perfectly for Your Needs

MKII models feature 14" throat depth and are available in various lengths such as: 6'6", 8'6", 10'6", 12'6" and 14'6".
