# MarkII TrimMaster

## Premium Cam-Locking Siding Brake

### FULL FEATURED - DURABLE - PORTABLE

The Mark II TrimMaster® is accurately and artfully engineered to be a workhorse for any remodeling contractor. Versatile in its ability to perform various complex bending profiles with ease. Go from bending simple flashing to intricate outside corner posts without making any adjustments to the TrimMaster brake. For decades, the durable Van Mark Cam-Locking system has proven to be easy on the operator while remaining reliable without constant adjustments or maintenance. Traditionally used to bend aluminum trim and gutter coils, it is also strong enough to bend light gauge steel for most residential installation applications.

#### POWERlock Cam Locking Top-Bar (F-Bar)

POWERlock™ provides secure clamping without the need to make adjustments when changing material.

#### Efficiently Designed to Save Time

Increased bending radius simplifies hemming resulting in easier operation and better results. POWERslot™ hinge "auto-measures" a 5/8" hem with ease.

#### Ready for Accessories

Features Van Mark's unique AccuTrack rail system to support recommended accessories like TrimCutter & TrimFormer.

#### Sized Perfectly for Your Needs

MKII models feature 14" throat depth and are available in various lengths such as: 2'0", 4'6", 6'6", 8'6", 10'6", and 12'6".
